07-13-2008, 03:05 PM free is the best freeware. Spyder 07-13-2008, 03:07 PM If you are not interested in creating a project and just want to import the samples and play them back, there are many other ways to do this. For example, Audacity can be used for this and it is probably the easiest to use for beginners. fastwav will do the trick as well.

BrentWhite 07-13-2008, 04:13 PM For those of us who don't have the option of installing the FL X2, is there a way to use

FL X for importing to FastWAV? Thanks for posting this. blammo 07-13-2008, 05:14 PM For those of us who don't have the option of installing the FL X2, is there a way to use FL X for importing to FastWAV? Thanks for posting this. There is a piece of hardware called an Audio Hijack Host for using the track and cue function of FLX. fastwav will do the trick as well. Can it play a file in realtime when you use Audio Hijack Host? These ones are great for loading 1 1/2gb cd's in less

than 5 minutes: QGIS Style Sheets / use Style object in script I have a layer and I want to define styles based on this layer's attribute. In attribute table of the layer I have 3 attributes that I want to use for styling (type, color and size). Now I tried to save this layer as a new Style object. Now I want to use it in a script. But I can't figure out how to do it. My script is:

```
import processing
```

What's New In FastWAV?

---

---

----- FastWAV is  
designed to be a quick and useful  
WAV/MIDI browser. FastWAV has  
special support for loading samples for  
the selected FruityLoops channel.  
Selecting a wave file brings up it's details  
and starts playback. Playback can be  
looped and the volume, pan and  
pitch/frequency can be easily adjusted.  
This version uses a slightly modified

---

version of the code in bpmutant This new version adds the ability to load/unload a WAV file, MIDI file and it can be used for loading/unloading of a Fruity Loops song. Includes some new features like

- Adding/Removing file in-built
