Just type the keyword in search form & you will get a list of websites which is related to your search and you can select any one or more websites from that list. Category:Software that uses Qt Category:QuranQ: Best Practice to Monitor Sensitive Information in Java Is there a good best-practice approach to monitoring changes to sensitive information in a Java application? I'm trying to figure out how best to architect a system, and one of the critical parts is how sensitive information is handled. Is it alright for something like a connection's user and password to be stored in a text file? Is it alright for a Java (like the default XmlSerializer) to serialize an object to text and then parse back text for later use? If it's not alright, how should that sensitive information be handled? A: It really depends on the sensitivity of the information and how you expect it to change. I would try to avoid storing passwords in plain text at all costs - this may not be feasible. However, what you mentioned is just fine. You could store passwords in plain text, but do not write it to a file. Instead you encrypt the passwords and store the encrypted version on disk. You don't have to write this yourself - there are plenty of products which do this. You store the decrypted passwords when reading the data from disk, and decrypt them when needed (e.g. during a login). Delayed separation of the twins and polydactyly with congenital syphilis: are they related? Although the patient described in this report was originally diagnosed with congenital syphilis at 10 days of age, he manifested in later life signs characteristic of the dental and skeletal manifestations of the disease. Synostosis of the midfoot and tibiotarsal articulations with polydactyly of the left hand and foot and delayed separation of the twins were observed. Although the relationship between polydactyly and delayed separation has not been elucidated, such findings are known to occur in association with congenital syphilis. Congenital syphilis should be considered in the differential diagnosis when these manifestations develop in an infant or young child.Wanted, Wanted Wanted, Wanted may refer to: Music Wanted, Wanted (Don McLean album), 1978 Wanted, Wanted (Joan Armatrading album), 2008 "Wanted" (Sia 570a42141b
