What's New In?

RagTime Solo is a sophisticated layout program. There are many things in which it exceeds all the other layout programs. This program focuses on text, tables and pictures. RagTime gets its name from the wordragtime, which means a period in writing when one rewrites a paragraph or one replaces a word in a passage. There are many things in which it exceeds all the other layout programs. In contrast to the other programs, RagTime is a real text processor. RagTime can display text over and over again. It can combine different types of text in one page or one document. Everything is up to you. You can now set your text so that it is written, printed out, copied, formatted, rotated, typed, exported, filled with line breaks, cut, pasted, merged into another document, optimized for printing, or inserted into a table. It's up to you! In terms of text, RagTime is the ideal tool for the journalist. By inserting graphics, tables, pictures, calculations and transformations, you can create dozens of different documents from an original text file without changing a line of code. Through the calculation functions, you can easily get a rough idea of the progression of your article with a single glance over the page. The picture functions let you insert images, insert pictures from other sources or crop borders.

With a number of functions, RagTime can even turn text into drawings, create graphs and others. If you don't know how to do that, you will find out. After creating the document, you can publish it so that others can see it. RagTime supports format independent HTML output. This enables you to create your own e-mail address and to publish your documents via e-mail or the Web. As always, text, tables and graphics can be archived or saved as a file. With a special function, you can convert a document to a PDF file. Your documents, in the end, can be published using an inkjet printer, a laser printer, a plotter or a XPS-printer. With a Google Docs account, you can link to all of the usual publishing systems and make your documents accessible anywhere on the Internet. And your visitors can easily print them with the usual applications. With RagTime, you create documents with the most important features, from text to graphs, tables, pictures and e-mailing. You can add comments at any time to your document. RagTime offers a large selection of fonts,
