It automatically removes or hides ads and other websites trackers for you. It uses Invisible Windows and other techniques to ensure that your personal and browsing data is protected from the web. What is it? Trojita is an application for Windows that is, at its core, a browser. Whenever you visit a website that uses Web Analytics, Pop Ups, display ads or other unwanted tracking methods, you see a new window behind the browser that has a full-screen immersive interface for viewing and interacting with that site. It can be made to look and work like the browser on any other desktop system, and when you leave the site, the window simply disappears. How does it work? Trojita is downloaded as a driver, and installed onto your system. Then, when you view a website that uses Web Analytics, Pop Ups, display ads or other unwanted tracking methods, it will open a new window that looks just like the browser. When you leave the page, it 91bb86ccfa
