Unicode Symbol Selector [Mac/Win]

-------------------------- Unicode symbol selector allows you to copy any symbol from anywhere in the web. Symbols are divided into categories and can be selected according to you. All categories in the program can be freely adjusted as you wish. How to use: ------------- 1. After the application has been installed, please open a browser and type the address protected] 2. Click on the button "Feedback" and choose "Unicode symbol selector". 3. Then press "OK" and the program will start. 4. Then, press "OK" to select the category and the symbol you want to copy and press "OK" again. 5. If you want to copy a symbol with translation, just hold the "C" key while copying the symbol you want. 6. Click "OK" to copy the symbol to your clipboard. 7. If you want to copy a symbol to a document, just select the document name and symbol with your mouse. 8. Click "OK". Please do not use a third-party software to copy symbols. ©2010.COME ON! Inc. --- In The News(1) From:?Zhi-Yun Xiong (zhixu_work@yahoo.com) Date: Thu, 12 Mar 2006 22:34:33 +0800 (PST) To: Is it possible for Chinese Unicode symbol for left bracket (left open brace) and right bracket (right open brace) not showing up in Mozilla browser? It is OK in IE? Also, how to know if Chinese Unicode symbol for left bracket (left open brace) and right bracket (right open brace) is installed in my computer? I am currently using (Macintosh) System version 10.6.6 and Mozilla version 1.7.13 Please advise? Thank you. From:?Tian Y Date: Thu, 12 Mar 2006 12:49:35 +0800 (PST) To: How to apply Unicode system fonts in menu bar of Mozilla Firefox? To copy symbol from web, it is not necessary to install all system fonts of Unicode software. What I have been doing for some time now is to copy symbol directly from menu bar of Firefox. But it is just a little bit inconvenient for me.

What's New In?

Unicode symbol selector is a small and handy tool that allows you to copy any symbol you want in your clipboard. Unicode symbol selector is a small and handy tool that

allows you to copy any symbol you want in your clipboard. Whether you are looking for the multiplication symbol or Chinese letters, Unicode symbol selector has it all! ============= Usage: ============= Type the Unicode symbol (triple quote) you want to copy. Click the clipboard icon in the top right corner of the window. Then click on the symbol to copy it. To undo a copy, hold down Shift and press the key on the keyboard corresponding to the Unicode symbol you want to paste. ============= Features: ============= - It can detect whether the Unicode symbol you want to copy is a series of letters or an image. - An action menu shows all the Unicode symbols you can copy and paste. - The "pitchfork" icon can be used to copy or paste more than one Unicode symbol. - Each Unicode symbol can be formatted by click and drag to be centered, vertically or horizontally. - The black and white color icons can be used to copy Unicode symbols as patterns. ============= Limitations: ============= - Due to the limitations of Java, the left end of the symbol may be cut off, and the symbol may be cropped into a smaller part. To copy the full symbol, resize it first and click the copy button on the icon, or click the "pitchfork" icon. - There is no way to sort Unicode symbols. ============= Information: ============= This application was developed in Java. The package name is com.milltech.gui.unicode. The author's homepage is This application is distributed under the GNU General Public License (GPL) v2.0. Version 2.1.0b released on Jun 11, 2005.
