Download

April 27, 2021 - Troubleshoot video playback in Premiere Elements. As you continue editing, you may only be able to render a small portion of the timeline. For example, you can only visualize one-fifth of the entire project. You can easily play whatever you have selected, and when you click the Play button at the bottom of the preview panel, the entire project will be open for viewing. If you want to display everything, you can turn on the playback feature in the Project Viewer Help menu. The "Show All" option will be selected in the dialog box and you will be prompted to start or stop playing the project.
