

Identified and the patch suggested by Sebastian Andrzej Siewior. . information extracted from control frames that create or update P2P peer records (for example, information extracted from control frames that create or update P2P peer records (for example, ... How to get information from management frames that create or update peer records? I would like to learn about how to find out what records are created/updated in a node and access them If you know the node ID and how the blocking (P2P) mechanism works for your network, you can do this using the "find" method.
