Organizing as you edit In addition to organizing photos by when you shoot them, it's also beneficial to organize them by the kinds of problems you want to fix. For example, the first photo in Figure 4-2 is a collection of 18 photos that were shot together. In the Organize section, you can view the 18 photos as one group, rather than as individual photos. FIGURE 4-2: You can group together similar photos as a group to make editing them easier.

Chylothorax: a significant cause of morbidity and mortality in patients with chronic renal failure. For the purpose of estimating the incidence of chylothorax in the renal setting, we retrospectively reviewed hospital charts for 61 patients with end-stage renal disease who had chylothorax diagnosed by thoracentesis or pleural fluid cytology. We identified 14 cases of chylothorax among 61 patients (23 cases in the pleural effusions and 38 in the chest tubes). In addition, 4 of the 61 patients had chylothorax without the presence of effusion. The mean age of the patients was 61 years (range 24 to 84). There were 13 men and one woman. Seven of the 14 patients had solid malignancies. All but two patients had undergone previous procedures, including renal transplantation, thoracic radiation, and splenectomy. Ten of the 14 patients had undergone single-lung transplantation. The incidence of chylothorax at the time of presentation was 6.6% (11/171). The median survival after the onset of chylothorax was eight days (range 1 to 32 days). The mortality attributable to chylothorax was 14.3% (2/14). The longer the period from the onset of the chylothorax to death was, the greater the mortality was. Patients with evidence of sepsis and who underwent dialysis or hemodialysis had a median survival of 4 days. Respiratory failure due to chylothorax and cardiac failure were found to be the primary causes of death in two of the two patients who died. Chylothorax is a significant cause of morbidity and mortality in patients with end-stage renal disease. In addition to the deterioration in the hemodynamic status, chylothorax leads to respiratory failure and death.The Los Angeles City Council this week approved a measure to lift the term limits on members of City Council and the city's Board of Ethics. The measure was approved 11-2 with Councilman Curren Price dissenting. If approved by Mayor Eric Garcetti, the measure will last for two years. The only Council members barred from running are Antonio Villaraigosa and Hilda Solis. The measure must be approved by the mayor. According to the Los Angeles Times, which first reported the news, there was heavy lobbying from mega-developer USC's
