Category:Algorithms Category:Machine learning Category:Classification algorithms Category:Bioinformatics software for LinuxQ: Can't get the solution from the solver in PDFLT I get the solution of a problem from the solver and I know the function returns right answers. But I get a wrong message "Undefined function or variable 'LowerLimit'". MWE: %matplotlib inline from math import exp import pylab from scipy.optimize import minimize
V = [0,1] D = [-3.0*V[0]**2-1,V[1]**2-2] Vlower,Vupper =
pylab.linspace(V[0],V[1],N),pylab.linspace(V[0]-1,V[1],N) Dlower,Dupper = -3.0*Vlower**2-1, Vupper**2-2 def
func(var,lower,upper): UpperLimit, LowerLimit,UpperWidth=var[:2] return (UpperLimit-LowerLimit)**2 result =
minimize(func, [0,0], bounds = (Dlower,Dupper)) print(result) What I get: [0.0 0.0 0.0]

A: It seems like your version is not exactly recent; if you had installed it from the website, you should have got a separate application launcher program (3rd party install). It might have been installed with an older version of AlleleID. It might work or it might not. If your program is properly installed and running on your machine, I can't see any reason why you shouldn't be able to select it from the software center. Burgess family lawsuit against county ends with set-aside agreement Monday Sep 9, 2018 at 2:00 AM Eric Rogers, Star Tribune The family of a man who died after being electrocuted on county property last year has reached a settlement with the county that resulted in all claims against it being set aside, and the county agreeing to pay the family \$5.5 million. The settlement resolved a lawsuit that had been filed in Ramsey County District Court by the family of Alfred "Bud" Burgess. The settlement was announced Friday by Ramsey County District Judge Diane Olson. In October 2017, the county had filed a motion to dismiss the lawsuit claiming that the lawsuit was barred by the three-year statute of limitations for personal injury actions. The family argued that the county was continuing to provide services to the family after Bud's death, such as providing services to his survivors and paying the survivor's benefits. "We were trying to keep the cost of litigation down. We think we negotiated in a fair manner and that the board and the county attorneys believed that too," said the attorney representing the family, Scott Luckey. After a hearing and other negotiations by the attorneys,

Olson granted the county's motion to dismiss the case in May. In June, the lawyers for both sides reached a settlement that included a \$5.5 million payment to the family as well as the set-aside provision. The case is one of several lawsuits filed by families of other electrocuted people who happened to be working on county property at the time of the electrocution. County attorney Steve Grove said that a county attorney reported in early June that the county had reached a settlement that would resolve all the lawsuits. "We had a lot of interest in the cases," Grove said Friday. "We had a lot of interest in resolving as many as we could." There were 10 electrocution cases on the docket that Olson was allowed 570a42141b
