AutoCAD History AutoCAD's roots date back to the late 1960s. 1965–1969: A development team at Hewlett-Packard's PARC (Palo Alto Research Center) in California builds an object-oriented programming language and builds an interactive graphics tool called HP-Draw. 1969–1971: A development team in conjunction with General Motors, Meto Industries, and Xerox, and led by John Warnock, develops the Visiopharm system. 1971–1972: Visiopharm's graphics is used to control a human-operated robotic arm for assembling car bodies. 1972–1975: Visiopharm, Inc. is formed in New Hampshire, and is acquired by Petteri Nummela. 1975: The Visiopharm system is introduced to the public. 1976–1985: Visiopharm releases the Universal Graphics Language (UGL), a language for describing line drawings, and the Object System, which allows the graphical display of physical objects in a virtual three-dimensional environment. 1978: Visiopharm Inc. acquires the Visiotext division of Comper Software and the SSP Ltd. division of Autonetics. 1978–1986: Visiopharm develops and sells the Line Painter, a set of utilities for line drawing, including a batch-and-edit-line-drawing program. Visiopharm is acquired by Xerox. 1982: The first version of AutoCAD is released, initially for the Apple II and Commodore 64 computers. 1983–1985: AutoCAD is ported to the IBM PC, and the Apple III and Atari 8-bit computers. 1987: AutoCAD is ported to Windows. 1987–present: The current version of AutoCAD is AutoCAD LT. AutoCAD and 2D Drafting AutoCAD uses an unconventional, perhaps unique, approach to 2D drafting, which is in contrast to programs that use a more traditional (and often outdated) 2D drafting approach. Drawing conventions in AutoCAD are expressed with the standard units of measurement (e.g., inches, cm, or mm), and are expressed from the same axis, regardless of whether the drawing is being viewed in the vertical or horizontal direction. Other CAD programs draw the lines of a drawing perpendicular to the axis of a plotter or other mechanical

Notes Its not available anymore for 2019. There is a version for 2017 here: Endoparasitic marine fish (monogenea) from marine animals of the Far Eastern Seas (Russian Federation and Far East of the USSR) and neighbouring coastal waters (Kamchatka and the Commander Islands). Sea louse parasites are described from 25 marine animals of the Far Eastern Seas (Russian Federation and Far East of the USSR) and the neighbouring coastal waters (Kamchatka, Commander Islands and Amur Bay). Eighteen species of ectoparasitic monogenea, two species of endoparasitic monogenea and one species of heterophyid trematode were found. Infection levels were low: up to two monohelminth species were found in each host. The most prevalent group was endoparasitic monogenea, which included the suborders Orthogonontiformia, Cirratulida, Chaetogonida, Acotylea, Haliotidae and the subfamily Parasemichthyinae. Parasitism rates were comparable to those reported from other areas of the world. Six new species of endoparasitic monogenea are described. 306 S.E.2d 634 (1983) In the Matter of Marjorie L. KENDRICK, Respondent. No. 811SC1153. Court of Appeals of North Carolina. September 6, 1983. *635 Atty. Gen. Rufus L. Edmisten by Asst. Atty. Gen. Catherine F. Jordan, Raleigh, for the State.
