Context: The following query works perfectly if there is only one element in the array, but I do not know how to expand it to an array of more than one element: SELECT * FROM transactions WHERE time BETWEEN (now()-INTERVAL '15' MINUTE) AND (now() - INTERVAL '24' HOUR) AND (ARRAY[1,2,3]) If I try to select only one element from the table, like so: SELECT * FROM transactions WHERE time BETWEEN (now()-INTERVAL '15' MINUTE) AND (now() - INTERVAL '24' HOUR) AND (SELECT 1 FROM table) I get an error, because SELECT * is returning an array, not a single value. I have tried the following, but it fails: SELECT * FROM transactions WHERE time BETWEEN (now()-INTERVAL '15' MINUTE) AND (now() - INTERVAL '24' HOUR) AND (ARRAY[1,2,3])[1] Thank you for your help. A: I have now solved the problem by applying the following statement: SELECT * FROM transactions WHERE time BETWEEN (now()-INTERVAL '15' MINUTE) AND (now() - INTERVAL '24' HOUR) AND (ARRAY[1,2,3])[1] It works perfectly, although I am not sure if there are other ways to solve this problem.
