The Saracen campaign simulates the legendary adventures of King Saladin and his warriors, who fought back the invading Muslim forces. The campaign also features a separate Saracen city building and skirmish mode. Bonus Map: The map of Sinbad's adventures has been chosen as a good bonus for the player. You can put any town from this map into your game to create a new city for Ali Baba or to add an Arabian town to a city from your own city builder. It is up to you to choose your own fate in Sinbad's world! King Saladin: After Saladin's brother and predecessor Tughtigin died of old age, his son Sultan al-Ashraf ascended to the throne and managed to establish the Ayyubid dynasty in Damascus. Saladin managed to build up a large military following and he was able to secure the control of Damascus and the surrounding region. Almost a year later, in 1176, the sultan declared a jihad, or holy war, against all Muslim countries for the return of Jerusalem to the Christians. Want to read more about the "Saracen campaign"? What's new in Babble Royale:

Now if you've read the previous posts about Yeahs vs Everyone, you'll remember that I scored "Oh My God" a solid 4 out of 5 points, leaving "Seasons" a distant 7. What this means is that I absolutely love "Seasons", whereas I find much of "Oh My God" a little monotonous, so much so that after listening to it once, it's already come and gone. Anyway, from what I remember, this post follows the same meandering pattern as all of the posts around it and then hopefully someone will be inspired to come back and check this out. So here's Part 5 of my review.

Track 3: Better At this point I'd been listening to "Seasons" for almost two weeks straight, and therefore had become familiar with most of the tracks. Suddenly I discovered a startling revelation: just because I knew every word to every song on "Seasons", this did not make the songs any better, at least not in a way that amazed me and made me want to write about this album like I'd write about Imagine Dragons' epic "Demons". For example, in "Sugar Water" there is a part where you're lifted above the crowd of people into the sky on the back of something like a hot air balloon. Any time you hear a song with an "epic" quality about balloon/hot air/canoe/other airborne terminology, your typical brain is made to interpret the texture in a light way. The balloon, when used in the context of "Seasons" can be interpreted as "Modern Nature" or more likely "Heaven". Everything seems to fit into place. It can be interpreted as "heaven" when the words "better light" are used, but at the same time also can be the video in which fans can fly through a laser beam, so what's the fucking point of the song itself? I don't know. But it's so successful at getting across its message. So what's the message of the song "Better"? A few days after the epiphany I was able to think "Oh shit! That's interesting!" through a haze of alcohol and stress. I think it's the message that something will be better in the future. I don't think it's optimistic or anything. The future can be sad, but at least it's better, if only just in a philosophical sense, but it's still better. It's more of a sociopathic sense of optimism,
