In the world where Elden gods have ruled over the land for millennia, the power of the Elden Ring is in crisis. Only a few are able to hold and control it. It is said to be the source of power for the Ordo Keres. Ordo Keres are a race of dragons, who once kept balance and sanity in the World, but disappeared after "The Old Order and the New Order". Thus, the land was brought to a rough state where it was dangerous for the Elden gods to enter. The successors of the Ordo Keres have not yet arrived. Now the great crisis of the Elden Ring is upon us. It appears that Chaos and the enemy of the Elden gods have risen in the lands. Only by gaining the control of the Elden Ring can you return to the original world. But in order to get it, the "Rise, Tarnished" quest, which you can read about below, will also play a part. The Lands Between are separate lands, where new players can start their rise on the lands between cities. In this new world, you will explore the vast world via this game. *Features specific to each platform are described in "EXTRA FEATURES," so please refer to that section. Why is the character 'Bookworm' to be so strong? With his extraordinary perception, Bookworm can find all sorts of information and other characters in the game. But he is a weak character.

He takes on enemies by himself, often at the cost of everyone else. He picks up various items and uses them for his own benefit.

Once his goals are achieved, the book-loving character becomes stronger and even challenges the strongest monsters.

Are you strong enough to become a hero who is really good at slaying enemies? You will face a trial where you have to defeat the previous winner of the previous game, the strongest monster and the Icon of the Lands Between.

Each stage is a battle with all your might. You defeat all enemies and take the lead into the final stage.

This view model is constructed from the Id of the object and the name of the field that the user wishes to update. An example might be [HttpGet] public ActionResult Edit(int id, string fieldName) { var viewModel = new EditFieldViewModel(id, fieldName); return PartialView(viewModel); } This is used like so: [HttpGet] public ActionResult Edit(int id, string fieldName) { var viewModel = new EditFieldViewModel(id, fieldName); return PartialView(viewModel); } @model EditFieldViewModel @using (Html.BeginForm("Edit", "MyController", FormMethod.Post, new { @class = "my-form", id = Model.Id, name = Model.FieldName})) { } @Html.Action("EditingPartialView", "MyController") This is used in conjunction with the MyController action method: public ActionResult EditingPartialView(EditFieldViewModel viewModel) { if (ModelState.IsValid) { //do stuff to the viewModel } return View(viewModel); } However, if there is something wrong with the object in some way that prevents it from being correctly constructed (e.g. it is null, or if the name of the field does not match the field name in the EditMethod) the ModelState is invalid and no partial view will display. This results in a 'Unexpected character encountered while parsing the view: n.' error. This does not happen if the viewModel is constructed directly from the Id and fieldName of the object, which is why I believe this is a problem in the way I am returning the partial view.

Technology has advanced to allow instant communication anytime and anywhere. How can we even begin to imagine such a world without the tools available to us? Being independent and able to communicate with anyone regardless of distance is what makes the world go 'round. When we chat online with our family members or play games online, it can be difficult to differentiate between reality and fantasy. Could today's spell cast be the catalyst that sets fantasy in stone?
