

HyperMotion Technology is available in Pro Clubs in FIFA Ultimate Team™, FIFA Ultimate Team Mobile™, the FIFA Challenge Beta and when the game launches in September. HOW DOES HYPERMOTION TECHNOLOGY WORK FIFA 22 is powered by "HyperMotion Technology," a physics-based animation engine that analyzes player movements, attacks, tackles, aerial duels and on-ball actions. The engine uses motion capture data collected from 22 real-life players playing a complete, high-intensity football match in motion capture suits. The data collected from player movements, tackles, aerial duels and on-ball actions is used to power FIFA 22 gameplay. In the past, data-driven gameplay has been extremely limited. The data-driven layers of gameplay in FIFA are increased as a result of HyperMotion Technology, which enables more play variations, responsive AI and natural gameplay in FIFA 22, as well as in FUT and PES. Data-driven play was very much employed in FIFA 19, but the player-model-based play in the 2017 game limited its quality and scope of play. HyperMotion Technology will bring the most immersive experience to the ultimate level of physics-based play in FIFA 22. More about the new and exciting engine can be found here: SYSTEMS COMPONENTS FIFA 22 uses the renowned and most advanced next generation FIFA engine. The engine has evolved to guarantee players the best and most realistic experience in the field of play. It features an unmatched integration of physics-based game mechanics based on thousands of real-life player models and animations. Physically-based game play, coupled with enhanced Player Impact Engine creates the best game-play in the world. Focus on the details. FIFA 22 uses a complex and immersive animation system that guarantees performances based on millions of details. We have built a highly evolved animation system designed to process and simulate the millions of mechanical elements making up the player model. In addition to this, the new physics engine features all-new collision detection and automatic collision response enabled by the Player Impact Engine. Humanoid Player Model A better player model is only part of the big picture. The new human-model features more life-like animations, an improved acting engine and a new structure and motion system. The humanoid player model now features unparalleled detail and realism,

The award-winning Worldwide Leader in interactive sports entertainment, EA SPORTS FIFA delivers authentic athletic gameplay on a global scale and is the king of football games! FIFA is the most popular football game in the world, and FIFA on PlayStation®4 delivers revolutionary gameplay innovations across the entire game including responsive, physical off the ball movement, more precision and intelligence in ball control, and authentic player behavior, as well as Dynamic 3D Technology that brings the pitch to life like never before, true-to-life player attributes and more. #1 ranked football game on PlayStation®4! FIFA 22 Features Revolutionary Play & Intelligence Physical Player Movement Dynamic Player Trajectories New Ball Control AI Impact Player Collisions Full-Scale Game Physics PitchFX Technology Complete Crowd Engagement Battle New Teams from New Countries, New Leagues, and New Continents Take On the World in New Ways New Features

**Realistic Physics:** Player movement, gameplay styles, ball physics, and pitch visual fidelity are all set in motion, not just through increased visual detail or improved graphics, but through complex new physics models (Zorry's Law). **Dynamic Player Trajectories:** The most significant new player movement feature is Dynamic Player Trajectories (DPT), which was developed alongside our partners at Head2Hands, and can predict, anticipate and even learn player styles and player styles of key players, such as Lionel Messi. **Ball Control AI:** Taking cues from the human body, the incredibly intelligent AI thinks, anticipates and adjusts to you, with new AI improvements such as better decision making and improved ability to react to players, while leveraging the world's best supercomputer to react to decisions in real-time as you play and more. **Impact Player Collisions:** If you're going to impact a player, the physics engine for player movement will correct and mitigate for where you're going and where the other player is, and where you may impact him, minimizing the impact. **Reactive Bully System:** Bully is a feature that is part of the "play like a pro" program announced at E3 2013. The bully system influences behavior and decisions for both players and the crowd, calling into question the integrity of the player attempting to unfairly control the match. **Kick-Off Time Delay:** The kick-off time delay is an important bc9d6d6daa

the world to FIFA Ultimate Team. Also includes, FIFA 18 Player Impact Engine - Real Man in the Middle, RMCI = Reimagined Man in the Middle. AI players get to make decisions, using new intelligence powered by Club Atmosphere from the new Players Impact Engine. Environment - New Player Collision System - AI players now slide into tackles after making a decision. RMCI; five years of data, technology and play testing has resulted in a new Player Collision System that makes any player behave like any other player in the world and in the tactics you use. Reversible Kicks - It's all about goal-kicks. And no one wants to miss out on a game-winning chance. New reversible kicks gives you the choice between a shot or a cross-shot, with the latter providing a greater chance of getting the ball into the back of the net. And you can even use a reverse shot when you're the man on the spot - just like a human. Elaborate Free-Kicks - It's time to express yourself with the most realistic free-kick simulation ever in FIFA. Use your imagination and your creativity to control a truly cinematic free-kick. Use intelligence to find a teammate to create and use a combination of accurate positioning, trajectory and spin to deceive the goalkeeper and confuse the opponent. Quick Preparations - Quick Preparations is a new technique which allows you to prepare a free-kick much quicker than before. If you miss with a shot, you can still choose to take a quick free-kick at the moment your opponent moves out of position. Tournaments - There are two new national cup systems for Pro Clubs in FIFA Ultimate Team. Competitions not only feature the awards for competing teams but also an individual ranking which allows you to compare your own Pro status. Showing your own accomplishments against your rivals and friends will now only be possible in tournaments. AI Community - The AI community has been reinvented with the new Player Impact Engine. The new AI community features a fully-developed set of AI players and team tactics. Manage your team in both your Player Career mode and in Singleplayer. Possess a more realistic and diverse set of agents. Defend, press the attack, and score crucial goals! Video Loading
