There is no video player integrated into ffmpeg. By default, ffmpeg requires video files to be encoded and played through the libx264 library. In this case, a third-party app is recommended for converting YouTube to MP3 as well as editing the video's quality and bitrate. Nevertheless, ffmpeg works perfectly fine to download and play YouTube videos if you

MtGox Goldbug has revealed some of the most popular phrases online are being used to drain MtGox's users' funds. It appears Bitcoin exchanges are starting to adopt the technique known as "SIM swapping" - though the need to install expensive SIM cards for Android phones makes that rather less appealing than sending mobile money abroad. The company behind this technique, Blackshades, reckons more than a billion dollars' worth of Bitcoin are stolen each year from smartphones. SIM swapping is an
