Heckle Tactics is a fast paced fantasy turn-based card game with tactical depth. Your victory or your defeat will come down to your ability to quickly master and develop your skills at tactical planning, card play and, most importantly, reacting to your opponent's plays. Your actions are limited only by your opponents. There are no simple actions such as block and attack. Instead, each of your cards has a unique ability which must be strategically used and played to either hinder or support your opponents' plans. This completely online card game, free to play, pits you against two or more other players and requires nothing more than a steady hand, steady eye and steady nerves. Heckle Tactics is played from the bottom of a dark card deck, and victory or defeat is determined by the two cards that are drawn. Each card has its own unique abilities, and it is these unique abilities that will turn the tide of a game. At its heart Heckle Tactics is a tactical turn based card game. The cards are dealt and played in the order you choose and victory or defeat is determined by the two cards that are drawn, often at the same time! Gameplay: Each card has a unique ability, so you'll need to carefully evaluate each situation and choose your card carefully. Some of your cards may require you to hold back, letting your opponents take actions and making them worry about your cards. Other cards may allow you to trigger your opponents' "fear" cards (exposing their weaknesses), forcing them to hastily play cards or run the risk of going into defense mode. Others may force your opponent to use a valuable action card, making them lose the ability to play for a few turns. New School Planet, a fast-paced PvP planet survival game is now available for you to play. Planet survival games are all about the thrill of surviving on the final planet while you try to defeat all your opponents. Survival means not only collecting resources to build equipment but also building a power generator that produces massive resources that you can use to fight and beat your opponents. But don't let your guard down, your opponents will do everything they can to defeat you. If you want to win, you better keep your defenses up at all times! PvP: PvP means there is no limit on the number of planets you can play at once. No other planet survival games allow you to play so many planets at the same time. If you want to play more planets you can simply add more accounts. PvE
