A year after the commercialization of the first manned flights on Mars, a group of tourists left on the planet, unexpectedly the Earth lost contact with the group. Then it was decided to send a special group of troops, composed of deadly mercenaries, who would settle on Mars and dig out the meaning of the disaster and to change the course of things. Our hero - the commander of the group special forces, Elon. It is his task to gather as much information as possible and... to destroy the mutants who await the approach of humanity. The enemies - aliens with strange intellect, able to multiply at the same time, and have their own clock - something you have never seen. A lot of tasks on Mars, will be quite difficult to accomplish, but fortunately, you have a brave team to support you. Controls: In order to meet a challenge, we created a kind of dual battle - gamepad and keyboard support. When the player uses the input method, the main character is moved and controlled in real time; when the player uses a control pad, the character moves and does its actions in the game automatically, but the player can also open the configuration menu and do the necessary actions. We recommend using a gamepad. However, if you are not satisfied with the gamepad support, we provide a keyboard control. Controls: SHIFT - Jump SPACE - Jump Left mouse - Roll Right mouse - Fire Rotation button - Obey light Rotation button - ZOOM Rotation button - Orientation X - Fire burst X - Fire burst A - Fire burst A - Fire burst X - Fire burst X - Fire burst Left mouse - Fire burst Right mouse - Fire burst SHIFT - ZOOM Hold SHIFT and use the mouse wheel to zoom in/out When you hold the SHIFT key and use the mouse wheel, you can zoom in or out of the game view PS: We know that this project is not very big, we will provide all the modders and creators with free design documents (in Sketchup, 3D Studio Max etc.), because we want to give them the possibilities to customize the game more. REVIEW: \$500,000.00 THROUGH A CA\$H CARTE!

Auror, a game of strategy where one player is a gambler and one player is a banker. As the gambler, you start a bankroll. Each round you try to get as close to \$500,000.00 as possible, while the banker tries to prevent that from happening by accumulating however much money he wants and matching the right hand play of the gamble to make him lose. Dealer shuffles 5 cards. The gambler then plays the 5 cards, and whatever sum they equal is the bankroll. The banker then plays a hand and tries to exceed the value of the gambler's hand, the value that was matched is deducted from the bank and distributed the remaining money to the remaining players. You get 5 cards, and after ten rounds we are all even at the end of the bank, and the dealer gets a new hand. The banker then takes half of your bankroll and pays himself the corresponding amount, which is now the bankroll of the next round. Dealer shuffles 5 cards. The gambler then plays the 5 cards, and whichever sum they equal is the bankroll. The banker then plays a hand and tries to exceed the value of the gambler's hand, the value that was matched is deducted from the bank and the hand is passed to the remaining players. Players receive cards, the banker is challenged, cards are left in the middle of the table, and the banker is the card player. The Banker must have 3 cards to win. Each player must play sequentially. The bank is then redealt, and the player with the lowest number of cards wins. One player may cheat and deal unblanced cards, but no player may demand cards dealt by him. Once dealt, they are treated like any other hand card. Thus the bluffing value of a lucky card is at its maximum.

The next three variations are "Blackjack", "Blackjack Switch", and "21 Switch". In Blackjack Switch the dealer is just a random card. In "21 Switch" the Banker must count to 21, by the final
