Kebab it Up! is a role-playing video game, where the player takes control of a character of an intergalactic food-restaurant, whose mission is to deliver vegetables and at the same time fight monsters (and kill them). Set in the distant future, the player takes control of Marvin: the chef of the Earth, a planet that has become overcrowded with humans and other dangerous creatures. The player will travel across the galaxy, battling enemies, gathering your courage while trying to succeed in your quest: to deliver the right vegetables to the hungry inhabitants of the Earth. In Kebab it Up! the player will have to reach the heart of a planet, eat as much food as possible, while fighting off bad punks and the ever hungry space-scorpions! Kebab it Up! is a unique role-playing game where the player will use a unique version of the Variable TicTacToe game engine which combines the artistically pleasant visuals of the popular game Angry Birds with the sounds and robustness of the legendary seminal Nintendo system, the Nintendo Entertainment System. Key Features: A top-notch art-style that will make you want to go to a kebab restaurant any moment soon. Full control of the character, in a role-playing game where the player is able to use all items and skills at their disposal. Numerous missions to explore. More than 10 enemy types to defeat, each one with a unique skill that will make them a challenge for any player to overcome. Additional campaign based on the Kebab universe. About the soundtrack: The music was composed and produced for the game by musicians: * Martin Donger, who has worked on titles like Bittersweet and all other games in the genre that contain heavy metal elements. * David Schmid, leader of the band Hexenwulf and also leader of the project Deinit. * Thomas Schmidt, guitarist for the band Bubukulcha and who also recorded a solo album: KOBOWLÖCK "FRUIT ROLLS". The soundtrack of the game is available for free download (in various formats), as long as the game is bought from the Steam Store. I made an error because a bundle containing the soundtrack was sent to me and I'm afraid that the original soundtrack ended up somewhere in the North Pole. If this happens, please contact me so we can work this out!Panc

POP: Methodology Experiment One - Game Of The Saeculum Edition DLC X64 [Updated]

You wake up in a weird abandoned house. You're dizzy and confused, you don't have any clue where you are nor how to get out of the house. The first thing you notice about your surroundings is that everything seems to be made up of its own dots, that color them differently and can even move around through the place. Your first goal is simple: get out of the house and learn what's going on around you. Although the game is not over yet and you've literally just begun its unique journey, you'll be asked to complete some mini games along the way. So to keep the game from becoming too easy you'll have to think outside of the box, use your brain, and sometimes even break the rules : the more you play, the more you'll understand what it is you're doing and how to proceed through the game. Remember that you'll need to make your way through the house using the dots as your only clue to navigate (and as you'll see later, it'll be kinda hard) Screenshots: Download (Flash): Chap1 - Flash Edition with fixed assets- 2.5Mb Chap1 - HTML5 Edition (with fixed assets) - 1.5Mb Chap1 - HTML5 Edition- 1.5Mb Chap1 - HTML5 Edition w/fixed assets AND PLEASE NOTE THAT THIS RELEASE IS THE FINAL ONE!!! This easily is one of the worlds most popular rpg maker that gets updated regularly with new features, added features and new expansion packs. More information about Sigma (Ragnarok) can be found on their website. The style of music in the video has been selected by me and a group of other YouTube sensations. Whats wrong with this footage? Something is seriously wrong with the video but I was wondering if anyone on the community could comment on this. Most RPGs are big on details, but does this look like it has any? Could it be FMV or prerendered cut-scenes? Or is it possibly the Diorama effect? Hopefully someone is able to shed some light on this. Psychedelic Ingame Music - SFM It could be any one of these effects but the best guess is modul8's MK8. This post explains all: v007? Well, it's hard to tell. In the future, quality will be increased and will shed more light on this. But in the meantime I'm posting this video. We all hope that either MK8 or a future mod will make this scene more interesting. Cheers.

Abilities – Unlock abilities by spending experience

The Storm League needs heroes. Enter new players. Sometimes you get lucky and your new players get really lucky.

From now until the end of summer, you can join any season and receive a prize. Everyone has a slight advantage. New season are harder to win the league so they give more experience!

But not everyone gets the same experience though.

Some players get a regular boost, while others get to unlock special abilities.

The special abilities might make you look cool. Or they might make you a god. It depends.

All of these abilities require experience to use and all of them are permanent.
