Find new and used items for sale, such as electronics and mobile phones. A modern new approach to selling second hand goods.Q: Is there a way to use Abstract Data Types in C++? I know that C++ doesn't support ADTs (eg: List), but is there any way to imitate this in C++? A: I think ADTs are only supported in C++11 (or something like that). See this page about SGI/Lisp/Unix C++ interface to CL in C++ which would be a "translation" to C++: 1. Field of the Invention The present invention relates to a device for imparting an edge-roughening to a paper sheet, and more particularly, to a paper sheet edge-roughening device which, in order to enable roughing of the edges of the paper sheet, causes jetting from the open end of the nozzle to form pulses which are arranged in a row and can be used in the ruffing of the leading edge and the trailing edge of the paper sheet, as well as in ruffing of the bottom edge (or the corner portion) of the paper sheet. 2. Description of the Related Art A device for imparting an edge-roughening to a paper sheet, as is generally known, causes jetting from the open end of the nozzle to form pulsed jets which are arranged in a row, and imparts an edge-roughening to
