It's a day of celebration, a day of remembrance. You can never resist the calling of the Dead, as the Dead have so forcefully called. You will come back to the former time-space that you once sojourned, never to return, a hallow spirit, a faceless soul doomed to roam the Earth, ever yearning for a reason to embrace mortality. YOUR DESTINY IS TO OPEN THE DOOR TO DEATH! Approach the door, ring the bell, and travel through time and space to your destiny, where nothing is forbidden or impossible. - Here you must pay your respects to the DEATH, the god of all gods. - To get to the door where you hear the bell-ringing you must conquer life's obstacles such as NATURE, FEAR, and FUNDAMENTALISTS. - THE POOR! Though you shall harm the gods you're doing their work for them! - The armored and the weak may pass through here. - THE UNKNOWN! You'll find new things to discover here! - LAND OF THE LIVING! A land of adventure and playfulness. The Land of the Dead warriors were possessed by spiritual energy and drove their opponents out of the Land of the Living. - SOMEONE IS GOING TO PAY! You can only be killed by other Dead Warrior Tribute players. - I AM DEAD! Death can bite, and it certainly will kill you if you refuse to accept your fate! - The more times you die the more you become the DEVOURER OF LIVING SOULS! - YOU'RE DEAD. But you're still alive. There's something you have to do. - YOU'VE GOT FEAR! NO MATTER HOW COUNTLESS YOU SPIN TOWARDS UNLEASHING YOUR LESSON! - PASS CHAINSAWS through your hands and your fate is sealed! This is the doorway, pass through! - IF YOUR LIFE IS WORTH SOMETHING, IT IS NOT TOO LATE TO RETURN TO THE LAND OF LIVING! YOU WILL RETURN ONCE A YEAR! - I AM NOT A GODDESS! I am a fallen goddess, and I have come to burn this evil world down! - THE LAND OF THE DEAD WILL DESTROY THE LAND

- Gal-X-E is the remake of a game from the 80's called Gal-X2. This remake is pretty much just like the original but with updated mechanics and a few new things. - The game is also known to be longer than the original because of the new difficulty, new game mode, and new campaign. - The game currently supports English and Polish. Some of the text is poorly translated, so be sure to let us know if you find an error. - The game is being made by just one single person, but I hope to release it in the future! - Gal-X-E has no ads. [Brief Overview] Gal-X-E aims to revive the old-school shoot em up genre, and adds modern elements to it! Fight your way through endless waves of randomly

generated madness! Collect spaceships and show the enemy who's boss! [GamePlay] Gal-X-E offers unique and interesting gameplay. Unlike traditional modern games where players can upgrade themselves until their power level reaches "Over 9000!", Gal-X-E relies on the actual skill of the player. Even though Gal-X-E offers new spaceships to be built, they only provide minimal improvement. All classes are completely unique in the way that they play, so try to find the one that suits you the most! Players are thrown into an arena where they fight off hordes of never-ending enemies. Kill enemies and collect score multipliers to gain incredible amounts of points! [Spaceships] Gal-X-E presents the player with 24 different spaceships, divided into 6 unique classes as follows: Light: High agility, as well as a rapid fire-rate with low accuracy. Medium: Normal firing rate, higher damage, and slower speeds. Heavy: Low fire rate, high damage, and good accuracy. It's almost a portable cannon. Shotgun: Capable of dealing devastating damage, though you'll have to get uncomfortably close to maximize the effect. Sniper: These bad boys are 100% accurate, and deal one shot one kill hits. You'll have no excuse for missing this time! Chaingun: The most inaccurate, yet highest damage class! It's basically spray and pray for noobs. [Enemies] Every enemy in Gal-X-E provides a unique challenge to overcome, but we won't go about spoiling c9d1549cdd

I know that everyone is running various mods (and I say that as a modder myself!), but I've not been able to replicate the performance of the game in Fullscreen. There's not a whole lot I can add to help fix the performance issues (game crashes regularly) that are happening in the main game, so I'm playing as-is in windowed mode only. I have noticed (on my PC) that the game can become unstable when players spawn into the void (underground system), especially with mods installed. I do not experience any problems on my Laptop/Console that are happening on my PC. For fun, I decided to edit the launcher to add an option to toggle starting in air and underground to see if there's an impact on FPS or if that solves the unstable FPS issue. Here's the code for the launch options (do not include option to toggle spawn in air and underground as that's already available in the launcher): I use Spyhunter to periodically scan for viruses and Malware. This happens often during the fight with hordes of Charr, as well as the occasional player crash. Not sure if this is normal or not, but here's a little guide for playing the game in fullscreen mode with Spyhunter. (I'm using Spyhunter 0.4.0, so I'm not sure what version you're using, but basically you'll need to change the executable and the API definitions) Rename Game.exe (or wherever your Game.exe is stored) to Game.exe.virus (example: Game.exe.virus) Move the Game.exe.virus to a location where Spyhunter can read it, such as C:\Spyhunter Run Spyhunter. It will open a black window with a blinking cursor in it. Press the "Run Scan" button and wait for the scan to finish. It will pop up a popup with the results of

the scan. (You will need to figure out how to get rid of the popup, but I've had luck in the past with clicking on "hide", or closing the popup window without selecting anything). NOTE: if you are using a keyboard and you want to execute Spyhunter, press "CTRL+SHIFT+R"
