Q: How do I keep a "while loop" running until a user input is valid for Java I am a Java student, and I am trying to make a program where a user enters an integer and then has to type the number back correctly or not. I want to use a while loop to do this. The problem is that the program terminates immediately on any attempt to give a wrong number. My code looks like this: `public static void main(String[] args) { int num1 = 0; do { System.out.print("Enter a number:"); num1 = keyboard.nextInt(); } while (!num1.equals(nextInt())); } and public static int nextInt() { Scanner in = new Scanner(System.in); int n; System.out.print("Please enter an integer:"); if (!in.hasNextInt()) { System.out.print("Not an int"); }`
