BMX racing in the streets and desert, dirt-track racing on trails, extreme off-road racing in the treacherous forests - get behind the wheel of the all-round champ of any track and complete all the circuits. In MX vs ATV All Out - 2017, the Husqvarna TC 125 delivers the same stability as in off-road racing on the trails.1. Field of the Invention

This invention relates to a process for the production of methacrylic esters of the general formula: ##STR2## wherein X and Y are individually selected from lower alkyl, lower acyl and cycloalkyl, Z is lower alkyl, n is a number from 0 to 2, and A is lower alkyl which comprises a process for reacting a compound of the general formula: ##STR3## wherein X, Y, Z, A and n are as defined in the first formula, with a compound of the general formula: ##STR4## wherein Y' is lower alkyl, lower alkenyl, cycloalkyl or cycloalkyl substituted by lower alkyl or lower alkenyl and n' is a number from 0 to 2, under reactive distillation conditions, which is preferably carried out in the presence of a catalyst and at a temperature of from about -10.degree. to about 0.degree. C. 2. The Prior Art Methacrylic esters of the general formula: ##STR5## wherein X and Y are lower alkyl are well known in the art. A process for the production of such esters is shown in U.S. Pat. No. 3,845,163. Such esters are used for example as hardening agents, plasticizers, wax softeners or they may be employed as monomers for the production of polymers. The production of methacrylic esters of the general formula (I) is described in CA 81: 144584 (published Mar. 6, 1981) wherein methanol is used for catalytic distillation of methacrylic acid in the presence of an acid catalyst, e.g. sulphuric acid. This reference states that the "distillate is recycled after the esterification step to the distillation column reactor, is distilled to separate the esterification product from methanol and hydrogen chloride and is recycled to the methanol-recovery zone." The methacrylic esters produced in this reference are not meth
