**process can open (X-Plane Standard).**

Turn off add-on Savegames (optionally if N-key disables account changes from activation):

Uncheck the 3rd checkbox and save configuration. If you enter later the add-on, open terminal and kill all process. By this method your add-on will be enabled. Please use this only if you feel I violated patent law or the game was not updated together with add-on.

Better, insert the cd and reopen X-Plane Standard or Manager, only reinstall the games and launch X-Plane or Close X-Plane and Kill all process via or the window menu!

Unpack
