**TimePlanner Crack+**

TimePlanner provides an easy and accurate way to develop a work schedule for your project. It's like having a brainstorming session on paper! It is an indispensable time management tool that you'll definitely use once. It helps you organize your ideas on paper, by representing them in a tree structure. The idea is to plan your tasks and resources in a highly flexible and customizable way. The tree can have multiple levels and when you put an action on a node, it immediately appears on all descendant levels. The background color of a node indicates how long the task has been in progress. You can easily save your schedule, so you can always find the original and developed schedule just in seconds. You can expand/collapse tasks and resources to see only the tasks that are pending, which is very helpful when working with a deadline. You can also edit each node in a very intuitive way. You can easily select nodes and move them. You can delete nodes and tasks. You can also add actions to make life easier. You can drag and drop actions, add/rename and rename nodes, and export schedules in many formats, including CSV, Excel and Lotus Quickr. Setup is very easy. Just add names and email addresses. You can easily save your schedule. You can edit and save your schedules. TimePlanner Description: TimePlanner provides an easy and accurate way to develop a work schedule for your project.
