In deriving the Nambu-Jona-Lasinio mechanism of confinement in the full theory, the quantum fluctuations of gluon fields and the quantum effects in vacuum fluctuations of quark currents give rise to the contribution to the effective coupling constant ((17)) which is suppressed by the factor $1/N^2$. The exchange of intermediate quark states gives rise to the factor $1/N^2$. Further, the factor M^4 comes from the change of normalization of the operator $\hat{D}^{(\alpha)\beta}_{\rho\lambda}$ due to the Lorentz-group contraction of $(0,3)$ -dimensional space-time, and S^3 results from the $1/N$ factor coming from the "loop-less" line due to rescaling of quantum gluon fields in accordance with the current conservation. The interaction of two gluon fields produced in this way has the form $\int d^4x_1 d^4x_2 D^{(4)}(x_1, x_2) \text{left}(\delta^{(\alpha)\beta} (2\pi i \theta)^2 - (2\pi i \theta)^2 \text{right} \hat{D}^{(\alpha)\beta}(x_1, x_2)$ where $D^{(4)}(x_1, x_2)$ is the effective $(0,4)$ -dimensional Green's function which is determined by the Green's function of the original gluon field. The expression for $D^{(4)}(x_1, x_2)$ can be found in the literature (see, e.g. [9]) in the soft-gluon approximation. The expression ((17)) for the effective coupling constant can be

"Set on a futuristic space colony, the name of the game is platform fun. When the main character is kidnapped by unfriendly aliens, they strap the poor thing down and test him on their trampoline. It's a prison of sorts, really. You'll be bouncing through the maze of trapezes and zany room transitions, trying to escape. But as the levels get tougher, the fun gets a little more difficult." Kris Strauser, YouTube Gaming Follow the game on twitter to get the news about its new features as they are released. "It's an innovative blend of mechanics and visuals that is a fun and rewarding experience. The mix of climbing, wall manipulation, and light platforming is cleverly balanced. For fans of puzzle platformers, this is a must-try." Awards Best Indie Game 2013 by Penny Arcade "Indie Gamer Top 10 Indie Games of 2014" Best Indie Game 2014 by Pocket Gamer "Swaps and Traps gets smart and the puzzle gameplay is fun." "The leaps in technology are sometimes blinding." - Pocket Gamer "Every game has a story, and Swaps and Traps is no different. This is an ingenious twist on the puzzle game." "The game oozes personality. One of the reasons I love indie games so much." - Nitrome "Take the best elements of old-school platformers, and merge them with the best of modern-day puzzle games." - Crashland "Striking visuals and an inventive mind that makes the game fun." - PC Gamer "What the game lacks in originality, it makes up for in brainpower." - Game Jolt Swaps and Traps The catch is that you'll be lost in a flat black limbo between worlds. It is the psychedelic black mirror of hell. You've been in this situation before. You've crashed. You're not in a car. It's not a person: It's a thing. It has arms. It holds something in its mind. What is it? A robot? A machine? What are machines made of? It knows. It knows you're on the plane, and that you're about to die. So it hands you this spinner. You spin and spin. The world shifts, again. The screen flickers blue and red like a punch-me-in
