
XP Protector Crack Free [2022]

XP Protector Crack + [Latest 2022]

XP Protector enables you to customize the system startup process. It requires little or no technical knowledge of administration. It allows you to customize many system parameters by configuring the system before the Windows XP start-up. Each of the available functions has a default setting, but you can easily change the settings. You can set up minimum and maximum time for user logon and logoff, configure the default browser and default application, set any application for automatic start-up, and so on. Furthermore, you can customize many of the features of the Windows 2000 and Windows XP systems. You can edit the start menu and the desktop items, change the desktop background color, edit font, icons, and so on. You can create and delete user accounts, restrict their privileges, and create groups. You can add, modify, and delete the permission for any file/folder in the system. You can also set the administrator password, the system password, disable the internet access, and set the time limit for internet access. You can change the default keyboard settings, manage the system sounds, and set any hotkey for any application. You can also restrict access to the system CD, floppy drive, and any external device. You can specify what files are always and never to be saved in the Windows registry and in the user's profile folder. You can see all available user accounts and user groups on the computer and edit their properties and the access permissions. You can create and delete passwords for users, or restrict their ability to create a new account. You can modify the login screen so that it shows a visual representation of your new settings. You can reset the login screen to its original configuration or always show a warning that the current configuration will be changed in the future. This software is freeware. It is compatible with Windows 2000, XP, ME, 98, and NT platforms. It's supports both 32-bit and 64-bit PC platforms. XP-Protector is a freeware software that is distributed under the GPL license. Limitation: In internet restrictions: only 2 sites and 2 keywords; time spend on internet can be set either to unlimited or limited to max. 8 minutes; limit of downloaded data can be set either to unlimited or limited to max. 1 MB daily and/or 7 MB weekly.
