Effect of phytochemical treatments of ginseng (*Panax quinquefolius*) on blood biochemical and hematological parameters in females with polycystic ovary syndrome. Polycystic ovary syndrome (PCOS) is the most common endocrine disorder in women of reproductive age. PCOS is generally characterized by excessive androgen levels, hyperandrogenemia, and menstrual irregularities. Growing evidence suggests that hyperandrogenism can interfere with normal ovarian function by promoting the growth of ovarian cysts. Ginseng is one of the most popular herbal medicines used to treat this syndrome. Ginseng is well known to modulate various inflammatory cytokines, plasma lipids, and glucose metabolism, and has been shown to suppress the increase of total and free testosterone in the blood. In the present study, the effects of ginseng root powder (GRP) and ginseng powder (GSP) were investigated in the treatment of polycystic ovary syndrome (PCOS) in PCOS induced female rats. The results of this study suggest that GRP and GSP could be used as an alternative natural remedy for this disease. GRP and GSP treatments decreased the total testosterone levels in serum. In addition, GRP and GSP treatments reduced the levels of MDA, FSH and LH in serum. In addition, the number of corpora lutea was increased by GRP and GSP treatments. GRP and GSP treatments significantly increased glutathione peroxidase (GPX) and catalase (CAT) activities in the sera of PCOS induced female rats. Furthermore, GRP and GSP treatments increased the activities of superoxide dismutase (SOD), and decreases serum nitric oxide (NO) levels in PCOS induced female rats. These findings indicated that the ginseng treatments have an antioxidant effect and alleviate the oxidative stress in PCOS induced female rats. Therefore, the consumption of ginseng can ameliorate the PCOS induced symptoms, possibly through anti-hyperandrogenic and antioxidant mechanisms. Game of Thrones may be taking us back to the Stone Age, but the next trailer for The Dark Knight Rises is here, and it'll most likely take the internet by storm. The two-minute teaser hit the web last night, and while it doesn't include any spoilers, it does show off some of the cool stunts and fight sequences from the upcoming flick. One sequence in particular has us wondering if Bane will be the next adversary for Batman to face. Check out the trailer below. IMAX has released another trailer for the film, which is set to hit theaters on July 18th, 2012. The trailer takes us further into the film's plot, which follows Bruce Wayne's attempt to stop an assassin named Bane (played by Tom Hardy) who plans on destroying Gotham City. Also starring Marion Cotillard and Anne Hathaway, it will be among the most anticipated movies of the summer. What do you think? Can you see Bane being Batman's next big villain? Bones (TV series) type TV Show network Fox genre Crime When the televised premiere of Bones' swan song hits in two weeks, Brennan will be the only damsel in distress remaining. Fox announced Monday that Booth and Brennan have broken up again, calling the duo's final episode (The End) "an emotional goodbye." The network also reminded viewers that Booth and Brennan have always been "the classic couple." "All during the creation of this season we had talks about Booth and Brennan's relationship becoming a bit more fraught, and they get into their latest fight," executive producer Stephen Nathan says. "Obviously, there's a lot of intimacy, and they fight, and I think what you'll get is more than you could possibly hope for with Booth and Brennan. There is going to be a lot of sadness and loss for them." And if you think Booth feels entirely done with wooing his love interest, you'd be dead wrong. Nathan says the creators are intentionally playing up a certain tension that will hopefully translate into more skullduggery for Booth. "Booth is still very hopeful," Nathan says. "As you watch, the audience will see Booth has that very hopeful heart of a romantic lead in him. When he's not with Booth, he's thinking about Booth. And when he does get with Booth,
