AVG Internet Security License Key 2019, Serial No, Crack Download.Q: How should I protect the \$outDir when using Gii? If I have multiple projects in a Gii generated multi project deployment, how can I protect my \$outDir from overwriting? I have tried putting an empty string or a unique name for example, in the \$outDir. The \$outDir will be overwritten anyway. I also tried putting a file with the same name as the \$outDir in the Yii project root but this doesn't work when using multiple projects in the solution. protected function configureWebApplication() {
