What's new in Farming Simulator 22 - Mack Trucks: Black Anthem:

Requirements; S T A C K M E N T S (WARNING: THE GAME IS NOW LIVE! SEE THE UPDATES AND CHANGES BELOW TO GET A WORKABLE HOW-TO) When I first released my Heeby Jeebies review, I did a real poor job of explaining to people that Farming Simulator is not a game you simply buy and expect it to work. I should have known better, because I basically needed to release a video in order to get it to work in the first place. The original simulator release resulted in no downloads, no people even trying, and it disappeared from my radar because everyone just hated it and it didn't work. I completely underestimated the potential for people to spend incredible amounts of time trying to get it to do what's supposed to happen. My first attempt to redo it was known as Farming Simulator 2020 and I thought that MAYBE, if it wasn't for anything else, I'd try again with something similar to that (as indicated by the name). After all, you're going to buy this game, you're going to spend a ton of time buying and editing it, eventually you're going to want some kind of feed back from it so you don't have to do it all over again. After it took a while for it to get this kind of feedback, the answer was obvious: yes! Create a tutorial of the exact steps one should take in order to create content to give to someone! Thus, this wasn't originally going to be a step-by-step walk through but a whirlwind of text that would say, "With these steps, and that tutorial, and now THIS, this thing to show that someone could actually get it working that way." That doesn't quite make sense. So, let's address the issue of what you should be able to do after following this guide. First off, you can play that if you were given a tip. You can follow this guide and start from step 1, and watch things work. And they WILL work. It's the BEST way to learn. BUT, make sure you put that tutorial to work, and then disconnect everything except for the dialogs! Now, you're starting a brand new, clean simulation. Once you do that, go through and mess around with the controls. You

need to press "ctrl" and "windows keys" toggles for each option you see. When you have all the control icons loaded up, save your settings so you can go in later to configure everything
