The AI engine, also powered by “Motion Capture,” builds on improvements made in “Real Life Football.” AI teams now take into account actual on-the-field tactics such as line-breaking runs and off-the-ball movement to attack. “Now, Artificial Intelligence plays like real opposition,” says David Rutter, Head of FIFA’s Football AI Team. “They initiate play cleverly and try to exploit the weaknesses of your formation. They constantly make tactical changes to your play, and are also more opportunistic - they create goal scoring opportunities when they see them.”

**Lasercromatic Refreshed.** For the first time in its history, FIFA is investing in the future of the Referee by leveraging the power of “Lasercromatic.” Referees and referees’ assistants across the globe now have the ability to call and signal events with a simple and fast system that has one hundred times the speed of current technology and accurately identifies players, cards and goal lines.

**Gameflow and Expected Saves Reframed.** FIFA introduced a new gameflow feature that enables players to easily go between gameplay modes and spectators can now watch replays as it happens in real time on their television screen and on their console. In addition, the Expected Goals system has been updated to now look at match situations from all positions on the pitch, including defenders. Players now have a better idea of how certain events might play out based on the strengths and weaknesses of their opponent and the circumstances of the game.

**Mesmerizing 3D Matchday Atmosphere.** EA SPORTS FIFA 22 introduces the most immersive atmosphere ever to be found in a video game, by bringing the players’ and coaches’ commentary to life right next to the action on the pitch. See and feel the emotions of your team as they work their way through your sixty-minute game with newly-updated footage from game highlights and match replays.

**Player Models.** FIFA 22 introduces player models that are more lifelike, which means player likeness is more accurate and players look and move better than ever. EA SPORTS FIFA 22 also introduces player models to include better representation of the player’s club shirt, with more club logos, colours and crests, and players’ association kits have been revamped to match the teams’ current kits and colors. Experience the New Career Mode. FIFA
