Before the advent of advanced firearms and magic, the power of the elden was bestowed upon a chosen few—the Five Lands of Eredin, the five masters of the Elden Ring. The Elden Ring served as a sanctuary to the last remnants of a once mighty people. After civilization was overthrown, the five masters were left to wander the world with their only two possessions, their knowledge of the Elden Ring, and a kind of magic born from the power of their long wanderings. In 2002, the original founding members began to gather, gathering abandoned swords, artifacts, and book knowledge from ancient civilizations in search of the restorative power of the Elder Scrolls []. A common thirst for power among all races drove the group, and thus, the original founding members became the dragonborn, the elven, the halfling, the human, the kaldereen, and the other races. We are now a community of people who endeavor to make the Elder Scrolls [] even greater. The TES[LORDS [], as they came to be known, soon became embroiled in the war between the dragonborn and the beastmen. This conflict eventually left the dragonborn scattered across the kingdom and drew the beastmen to the lands between, where the dragonborn were able to establish a secure sanctuary. The beastmen soon began their own cult of the Elder Scrolls, and the dragonborn soon joined them in earnest. The beastmen and the dragonborn have different viewpoints on how the world should be ruled. One council of elders, and one throne. A time of peace is coming... However, there were 3 recent rumors that stirred up a lot of thoughts within the Elgen Ring website, and these are the three things that were mentioned. *This article is a translation of the original article that was published in the official website. Elgen Ring is still a localization project and the Japanese version will be announced later. *The following news are translations of comments made on the official website on the July 2, 2016. 1. The game is currently in development *In an era of open world games and high-fantasy role-playing games that are taking the genre of epic fantasy to new heights, Elgen Ring is an action RPG that is likely to present a dark fantasy that is different from the historic fantasy of previous games. The genre is lacking the elements of old RPGs, and the team began gathering the necessary ingredients and refining them into something even better. *The game's premise is that a female shrine maiden of the shrine that protects the heart of the Land Between. Without a goal, she receives the power of a ghost and with it, she will rise to be an Elden Lord and help the people in the world. This was a concept that was first laid down by the original writer of "Kamimushi," and we have met with a great response from this. *At first, the setting for the title was a different world, but the concept that connects the gods of the two worlds came to be a bit different, and thus this far-off world was decided to be the one. *The development is progressing with the concept that there will be vast open fields. *In the development concept stage, the action-RPG style was planned, but the game has changed to something that is different from that as there is a strong impact from the action-RPG. That is the direction of the game that was decided on at the planning stage. *The development of the game started 3 years ago. From the start, it has become the leader in the RPG genre. 2. The basic requirements for the game are in line with a fantasy RPG *This is the only bff6bb2d33

Physical fitness at the onset of human development affects cardiovascular and/or metabolic health throughout the lifespan. We prospectively examined the relation between physical fitness, as measured by handgrip strength and cardiorespiratory fitness, and all-cause and cardiovascular mortality in a cohort of healthy young adults. Data were pooled from three population-based surveys in which self-reported physical fitness was assessed in 10- to 19-year-olds at baseline and re-evaluated during follow-up (9-3 years). In addition, muscle strength and cardiorespiratory fitness were objectively measured at baseline and follow-up. Mortality was registered by linkage with the national Swedish Cause of Death registry. Of 15 771 participants, 43% were women. In sex-specific analyses, high levels of handgrip strength were inversely associated with all-cause and cardiovascular mortality (adjusted hazard ratios 0-63, 95% CI 0-55-0-71 and 0-69, 95% CI 0-58-0-81, respectively). High cardiorespiratory fitness was associated with a lower risk of all-cause mortality only (0-66, 0-58-0-76). Fitness-mortality associations were generally stronger in men, whereas associations between sex and fitness were weak. Compared with participants in the lowest quartile, the fully adjusted hazard ratios for all-cause mortality for participants in the highest quartile were 0-44 (95% CI 0-30-0-68) for men and 0-65 (95% CI 0-42-1-01) for women.
