PA Soft Studio 14 Developer Version v1.2. This software may be downloaded from.Dear Investor, We at Onchain are excited to have an option to include the ONT paper token as an asset class in our CoinTracker, the world's first blockchain-based platform for cryptocurrency investments. This announcement comes at a very opportune time, when the sentiment in the markets is relatively bearish. Even more so, we are super excited to begin our discussions on this new integration with BitX, the first platform for exchange-traded assets (ETAs) on the blockchain. ETAs are trading instruments that are based on cryptocurrency. The BitX ETA already exists in the markets and is the first world-class ETA. Coined as ETFs and ETNs, ETAs are a fully regulated and reliable investment option. The trading of these instruments generally includes a basket of different digital assets, which gives a new dimension to an already lucrative and high-growth market. The further development and establishment of this asset class will allow the Onchain platform to strengthen its portfolio by attracting more on-chain projects, especially for transactions in Onchain's distributed ledgers. This option will not only have tremendous benefits for our new Onchain portfolio which is currently currently focusing on only two projects, but also for our users and the Onchain community. As an investor, you will be able to track any digital asset, regardless of its price or market value. This will be an easy to access tool to keep up to date on the biggest digital assets in the market and you will be able to be notified in the event of a price movement and the change of the blockchain address. For the first time ever, if you like one of the digital assets included in an ETA, you will be able to purchase the underlying asset directly from the ETA. The more we can facilitate the adoption of blockchain technologies for the benefits of both on-chain and off-chain communities, the better. With this announcement, we are hopeful that we can successfully facilitate the adoption of blockchain-based projects by the ever-growing number of new users who are becoming interested in cryptocurrencies. Best, Onchain Team NOTE: ONCHAIN CORE is the first

It is bounded to the north by Alabang, to the west by Muntinlupa, and to the south by Pateros. It is largely a residential community with some commercial activities. Balangay includes the areas of Rizal Avenue, Barangay East in Pateros, and the area of Pateros South in Barangay South Pateros. According to the 2010 Census, Balangay's population is 27,219. Balangay is the home of the Bureau of Fisheries and Aquatic Resources Fish Troop Barangay (B.F.A.R.F.T.B.). Etymology The name Balangay is believed to be derived from the Tagalog word balengay ("place of fish"), in reference to the Tiwi islands in the vicinity of the town. The original inhabitants of the island were the Tiwi and the Balanguingui, who lived by fishing and barter. The village was built by the Spaniards. Balanguingui are believed to be derived from the Tagalog word balugo, meaning "to fish", because the Tiwi used to fish in the nearby Palanan River. This village is also home to the Tiwi-Spanish people. The name Pateros was derived from the Tagalog words pata ("flowers"), which refers to the garden of the Tiwi, and erno ("mulberry"), in reference to the crab-eating macaque e79caf774b
