diplomacy is not an option is a game of strategy and diplomacy. An intellectual game can be played against the computer or a human opponent. It is a role-playing game, so the object is to use diplomacy to bend your opponent toward your goals.

This is an abstract game, but I have played the majority of scenarios with light customisation and found the game great! I cannot create my own scenarios as I am still learning the game.

The first time I played it, I felt a need to play the whole game, and that was a fantastic feeling. Diplomacy is Not an Option is a refreshing take on the Diplomacy genre, and challenges the players to think strategically and use diplomacy to achieve the best result possible. 'nuff said.

Each scenario plays very similarly, with most scenarios containing two parties. The scenario in "The Creative Destruction" contains four parties. Diplomacy is not an Option has a very basic learning curve. It is easy to learn and a good choice for both new and experienced players.

The Good Stuff

Diplomacy is Not an Option is an encounter based game. You take turns, with special rules for the different factions involved. It is played using a Powers, Cards and Fits system. Powers, Cards and Fits are the tools of the trade, and diplomacy is used to alter it.

The realistic factor of Diplomacy is great, and it can be used to great effect within the game. Fits are used to enable certain powers to be used, or to turn a power from one use to another. Fits are just as vital as Powers, and are extremely versatile
