_fmt.jpeg) At a glance, you may think Photoshop is just for technical professionals who need to work on photographic or movie-related images. In reality, Photoshop is a powerful tool that is often used by non-professional graphic artists and illustrators as well. Photoshop can be used to create interior and exterior environment illustrations or product layout

artwork. In fact, many of the "official" Pixar character designs that you see in movies were created with Photoshop. To use Photoshop, you need to have a computer that meets certain minimum specifications (usually a Windows operating system and 512MB or more of RAM) and an Internet connection. To access the Internet, most computers have an on-board web-browser called Internet Explorer. If not, you can purchase Internet Explorer for $20.00 (or $25.00 if you want the web-based e-mail program). You can use Photoshop in two ways: you can open the file directly or choose to work with it in Photoshop's File browser or the Bridge Application. ## Opening a Photoshop File To open a file in Photoshop, you can either

browse for it in the Files window (as shown in Figure 3-1) or double-click it, which will open it in Photoshop's main window. Figure 3-1. You can browse for files in the Files window or double-click them to open them directly in Photoshop. To open a file in the Files window, select the file from the left side of the Files window and drag and drop it to the right side of the window to open it. You may see a number of options in the Files window that you can use to access a specific version, section, or other option for the file. You may, for example, be able to see the document's size, file type, and other image properties. You can also use the option button on the right side of the window to access the Photoshop Options

window, as shown in Figure 3-2. Figure 3-2. You can view the file's properties in the Photoshop Options window. Once you have opened a file in Photoshop, the window may look blank until you create a new layer (discussed in the next section). ## Choosing File Options You can access the following options from the Options window, which is accessed from the File menu: * **Resize Image**. If you drag an image file onto the Resize Image button, Photoshop will

Former Democratic presidential candidate Hillary Clinton is expected to call out GOP nominee Donald Trump at an event in New York City Friday morning, according to a report. Clinton, her former presidential campaign manager Robby Mook and Democratic strategist David Brock are

scheduled to host a town hall meeting at the Cooper Union for the Sciences in New York City at 10:30 am ET. Former Democratic presidential candidate Hillary Clinton on Tuesday announced her campaign for the 2018 election, but her rival Hillary Clinton has already dismissed the former secretary of state as a "robot" and a "puppet" of the Democratic Party. Clinton was first elected to the U.S. Senate in 2000 after her husband, Bill Clinton, left office. After falling short of the presidency in 2016, the 2016 Democratic nominee is bringing her rise in politics to New York City for a previously scheduled speaking engagement. For the past several months, Trump has been selling a different political message as the Nov. 8 election approaches.

The Republican nominee has been campaigning heavily on illegal immigration and benefits for the U.S. military, but Clinton is calling on voters to reject the divisive rhetoric of the presumptive Republican nominee. "Donald Trump should withdraw," Clinton said in a video address to the American people. "He should ask to be removed from the ballot in every state. But so far he has only withdrawn from the election in a couple states." "He is the most dishonest person ever to run for the office of the president of the United States of America. I'm proud to call him a friend, but I am astonished at his unapologetic advocacy and promotion of this hateful and extremist vision for America," Clinton said. [First Look:
