Unlike MS Office, AutoCAD does not have a standard API to access its functionality. Most often AutoCAD extensions are implemented using AutoLISP or Visual LISP. This approach is tedious because it is time consuming to code the extension, debug, and maintain it. Developers working in C++, Visual Basic, or other development languages write their own extensions. The complex nature of AutoCAD, however, requires that developers use an appropriate language. AutoCAD product development technologies include the following: C++ - AutoLISP and Visual LISP. Visual Basic.NET - AutoCAD extensions are written in Visual Basic.NET.
